

BITS ON SUSTAINABILITY

Waste Hierarchy

Waste hierarchy management

The waste hierarchy is broadly depicted as an inverted pyramid topped with preferential options at the top base and disposal, as the end-all solution for managing waste, at the bottom peak.

Bits on sustainability are written by Fedrigoni's Sustainability Team and are part of the Group commitment to spread the culture of sustainability.

Prevention. Preventing a substance, material, or product from becoming waste, such as reusing products or extending product lifespan.

Re-use. Implementing actions to prepare (inspect, clean and/or repair) products or components thereof, having become waste, to ease recycling.

Recycling. Any recovery activity where waste materials are reprocessed to get products or substances, either for their original or other uses. It covers reprocessing of organic material (e.g., composting), although not including energy recovery for fuel purposes or for backfilling applications.

Energy recovery. Any process likely to produce energy from waste (e.g.: biogas production, waste-to-energy).

Disposal. Any process not aimed at material and/or energy recovery, such as incineration or landfilling.

Fedrigoni is committed to recover 100% of its waste materials, without landfilling, by 2030 (reference to base year 2019). We ended 2022 at 89%.

RE-PLAY: the revolutionary innovation that turns liner into premium labels

In 2022, Fedrigoni launched **Re-play**, a revolutionary range for Fedrigoni Self-Adhesives labels. From waste to premium label: for the very first time, the glassine liner is recovered and fed back to the production process as a front material to create new premium labels 2022. Re-play is a perfect example of **upcycling**, the result of an exclusive partnership with Les Papeteries de Clairefontaine, a further step to prevent thousands of tons of waste being produced, requiring costly disposal procedures. A huge breakthrough in product development.

One more step in our ESG roadmap in line with the 2030 goals, a revolution mirrored in our motto, “Making Progress”.
