

Fedrigoni Announces New Slitting Center for Self-Adhesive Labels in Germany in Q4 2025

- *The plant, in Frechen near Cologne, will serve Germany as well as the Netherlands, Belgium and Northern France. The plant will process films and papers for self-adhesive labelling in a variety of sectors, including food & beverage, personal care and retail.*
- *“The opening of the slitting center in Germany aims to support our customers in responding to the increasingly demanding self-adhesive market, particularly in terms of service and short lead times over the past few years. By positioning ourselves closer to our customers, we are enhancing both our lead times and overall service in this region, which remain top priorities for us” explains **Fernando Girón, Commercial Director EMEA Roll & Sheet Label at Fedrigoni Self-Adhesives***

Milan, 10 April 2025 - The Fedrigoni Group - a world reference in the manufacturing of self-adhesive labels, special papers for packaging and other creative applications, graphic supports for visual communication and RFID - has announced the opening of a new slitting center in Germany in the Segro Park Frechen, near Cologne, launching in Q4 2025, with the aim of strengthening its global footprint and serving customers even better.

This new slitting center will serve all customers in Germany, the Netherlands, Belgium and Northern France. With 6,400 square meters and three 2-meter-wide new generation slitting equipment, this state-of-art distribution center aims to produce 90 million square meters of high-quality films and premium paper self-adhesive materials per year for various sectors, including luxury packaging, food & beverage, personal care and large-scale retail, with the potential for future growth both in production capacity and in additional market segments served.

“The opening of the slitting center in Germany aims to support our customers in responding to the increasingly demanding self-adhesive market, particularly in terms of service and short lead times over the past few years. By positioning ourselves closer to our customers, we are enhancing both our lead times and overall service in this region, which remain top priorities for us” says **Fernando Girón, Commercial Director EMEA Roll & Sheet Label at Fedrigoni Self-Adhesives**.

Two factors drove the choice of this location: its strategic geographic positioning and its focus on sustainability, which is a priority for the Fedrigoni Group. Some of the rubble from the redevelopment of the site became recycled material for the new buildings. Heat pumps have also been installed, powered by electricity generated by photovoltaic systems on the roofs of the warehouses.

Thanks to this milestone, Fedrigoni Self-Adhesives significantly expands its capillary presence in the European market: the new German hub joins the slitting center in Poland, a strategic site for the north-eastern European market that Fedrigoni is constantly expanding.

Fedrigoni

Founded in 1888 in Verona, Italy, Fedrigoni is today synonymous with excellence in the world of labels and self-adhesive materials, special papers for packaging and creative communication, and RFID. With almost 6,000 people in 28 countries and 78 plants including production sites, slitting and distribution centres, the Group sells and distributes over 25,000 products in 132 countries.
